1	Project Overview
2	Platform Requirements
3	Categories & Services
4	User Roles & Accounts
5	Subscriptions & Payments
6	Admin Dashboard
7	Performance, SEO & Expansion
8	Budget & Deliverables

Dear Abdullah,

Thank you for your message and for your enthusiasm regarding the future vision of Sayaratak.

As requested, I have prepared a detailed requirements document outlining the platform structure, categories, user roles, subscriptions, payment options, core features, future scalability plans, and the overall direction of the project.

Please consider this document as the official project scope and foundation for the first version (MVP) of Sayaratak. While I understand that certain details may be refined during the UI/UX phase, I would like the design and development process to be based on the requirements outlined below.

In addition, I have attached the proposed homepage design that reflects the branding, visual identity, user experience, and overall direction I would like to achieve for the platform. The attached homepage should be considered a primary reference for the UI/UX design phase.

Important Notes Regarding the Homepage Design:

- The attached Sayaratak logo should be used as the official platform logo.
- The homepage design represents the visual style and user experience expected for the platform.
- I would like a modern, professional, clean, and trustworthy automotive marketplace appearance.
- The blue and white color palette aligns well with the Sayaratak brand identity and should be maintained across the website and mobile applications.
- The homepage should prominently feature:
 - Vehicle search
 - Featured listings
 - Nearby listings
 - Vehicle rentals
 - Dealerships
 - Workshops and mechanics
 - Spare parts
 - Main categories
 - Favorites
 - Notifications
 - Messaging
 - Add Listing functionality

I have reviewed the mockups carefully and will continue sharing any additional feedback, suggestions, or improvements before development begins.

I value your team's experience and welcome any recommendations that could improve the platform, user experience, performance, scalability, and long-term growth.

Thank you again for your professionalism and communication. I look forward to reviewing the agreement draft and moving forward together.

Best regards,

Ahmed Musa

Founder – Sayaratak

FINAL PROJECT SCOPE & REQUIREMENTS DOCUMENT

Project Information

Project Name:
Sayaratak

Project Description:

Sayaratak is a comprehensive online marketplace platform for buying, selling, and renting vehicles in Sudan, including cars, trucks, tuk-tuks, motorcycles, rickshaws, spare parts, and automotive services, with future scalability to support multiple countries.

Required Platforms

- Responsive Website
 - Android Application
 - iOS Application
 - Admin Dashboard
-

Main Categories

- New and used vehicles
- Multiple image uploads
- Video upload support
- Featured listings
- Direct communication with sellers

2. Cars for Rent

- Daily rental
- Weekly rental
- Monthly rental

3. Trucks

- Truck sales
- Truck purchases
- Truck rentals

4. Dealerships

- Dedicated dealership profile
- Dealership logo
- Cover image
- Dealership description
- Vehicle management
- Contact information
- Location details
- Ratings & reviews
- Verified dealership badge

5. Tuk-Tuks

- Buy and sell tuk-tuks

6. Spare Parts

- New and used spare parts

- Search by vehicle type

7. Motorcycles & Rickshaws

- Buy and sell motorcycles
- Buy and sell rickshaws

8. Automotive Services

Workshops

- Workshop name
- Workshop logo
- Location
- Phone number
- Working hours
- Images
- Ratings & reviews

Mechanics

- Name
 - Phone number
 - WhatsApp
 - City
 - Years of experience
 - Specialization
 - Profile picture
 - Professional bio
 - Portfolio / Previous Work Gallery
 - Ratings & Reviews
-

User Roles & Accounts

User Account

- Account registration
- Manage listings
- Favorites
- Messaging
- Saved searches

Dealership Account

- Vehicle management
- Subscription management
- Receive messages
- View statistics

Service Provider Account (Workshops & Mechanics)

- Profile management
- Service management
- Subscription management
- Receive inquiries and messages

Administrator Account

- Full platform management
-

Registration & Authentication

- Email registration
 - Phone number registration
 - Google Sign-In
 - Facebook Sign-In
 - Password recovery
 - Future support for OTP verification
-

Search & Filtering

Advanced Search

- By city
- By district / neighborhood
- By category
- By make
- By model
- By price
- By year
- By fuel type
- By transmission type

Nearby Listings

- GPS-based location detection
- Display nearby listings

Radius Search

- Within 5 KM
- Within 10 KM
- Within 25 KM
- Within 50 KM
- Within 100 KM

Map Search

Display on map:

- Vehicles
 - Dealerships
 - Workshops
 - Mechanics
-

Listings

Listing Status

-
- Available
 - Reserved
 - Sold
 - Rented

Listing Analytics

- View count
- Favorite count
- Phone click count
- WhatsApp click count

-

Subscription System

Individual Subscriptions

Admin can:

- Enable/disable subscriptions
- Define free listing limits
- Set pricing
- Set subscription duration

Dealership Subscriptions

- Multiple packages
- Custom pricing
- Vehicle limits
- Subscription duration

Workshop & Mechanic Subscriptions

- Dedicated packages
 - Full admin control
-

Payment System

Phase One

- Bankak Integration

Future-ready integrations:

- Fawry
 - MTN MoMo
 - Zain Cash
 - Visa
 - Mastercard
 - PayPal
-

Admin Dashboard

Manage:

- Users
- Listings
- Categories
- Countries
- Cities
- Districts & Neighborhoods
- Dealerships

- Workshops
- Mechanics
- Subscriptions
- Featured listings
- Notifications
- Reviews & ratings
- Reports
- Advertising banners

Listing & Report Management

- Review listings
- Approve listings
- Reject listings
- Remove violating listings
- Manage reports
- Ban users when necessary

Notification Management

- Send notifications to all users
- Send notifications to specific groups
- Send notifications to dealerships
- Send notifications to workshops & mechanics

Banner Advertisement System

- Create banners
- Edit banners
- Delete banners

Statistics & Analytics

- Total users
- Total listings
- Total vehicles
- Total dealerships
- Total workshops
- Total mechanics
- Total subscriptions
- Revenue statistics

Smart Notifications

- Saved search alerts
- Notify users when new matching listings are added

Languages

- Arabic
- English

Future support for additional languages.

Currency Support

- Sudanese Pound (SDG)
- US Dollar (USD)

Future support for additional currencies.

SEO (Search Engine Optimization)

- SEO-friendly URLs
 - Google indexing for vehicle pages
 - Automatic meta tags
-

Backup System

- Automatic backups
 - Backup restoration
-

Website Pages

- Home Page
- About Us
- Contact Us
- Privacy Policy
- Terms & Conditions

Editable through the Admin Dashboard.

Performance & Speed

- Platform performance is a top priority.
- Optimize internet/data usage.
- Compress images and assets.
- Support slow and medium-speed internet connections.
- Implement caching.
- Implement lazy loading.
- Optimize database performance.
- Optimize website and mobile app performance.

The goal is to provide a fast, reliable experience with minimal data consumption.

Future Expansion

- Multi-Country Support
 - Multi-Language Support
 - Multi-Currency Support
-

Final Deliverables

- Responsive Website
 - Android Application
 - iOS Application
 - Admin Dashboard
 - Database
 - Complete Source Code
 - Server Setup
 - Hosting Setup
 - Google Play Store Deployment
 - Apple App Store Deployment
 - Technical Documentation
 - Core Website Pages
 - 30 Days of Free Post-Launch Bug-Fix Support
-

Ownership

Upon Final Payment:

- Full project ownership
 - Full database ownership
 - Complete source code handover
 - Delivery of all project files
 - Delivery of server, hosting, and account credentials
-

Project Budget

Total Project Cost: \$3,000 USD

Including:

- Full development
- Server infrastructure
- Hosting
- Deployment
- Complete source code handover

No additional fees shall apply unless mutually agreed upon in writing.

General Notes

- This document serves as the primary reference for the project scope and the first MVP version of Sayaratak.
- The attached homepage design and logo should be considered part of the project reference and branding direction.
- We welcome your recommendations and expertise to further improve the product and user experience.
- Certain details may be refined during the UI/UX phase to achieve the best possible outcome.

- The goal of the first version is to launch a stable, professional, and scalable platform that can grow within Sudan and internationally.
- We look forward to building a long-term partnership. If Sayaratak achieves the expected success, we have additional marketplace and real estate projects that we would be interested in discussing in the future.
